

Lab 02: Content pillar allocation → Campaign economics

1. For the fictional Singapore SME, use brand goal, journey stages, available production hours. allocate educate, proof and offer posts. Return four-week pillar mix. Add source, assumption and reviewer columns. Reject when Posting volume is not a strategy.
2. For the fictional Singapore SME, use role, audience, facts, format, constraints. supply structured context and acceptance criteria. Return repeatable prompt template. Add source, assumption and reviewer columns. Reject when Vague prompts produce generic copy.
3. For the fictional Singapore SME, use product sheet, price list, campaign brief. trace every generated claim to approved evidence. Return claim-to-source register. Add source, assumption and reviewer columns. Reject when Confident output is not proof.
4. For the fictional Singapore SME, use customer feedback, permission log, loyalty goals. identify advocates and design a voluntary contribution loop. Return advocate engagement plan. Add source, assumption and reviewer columns. Reject when Incentives can distort authentic reviews.
5. For the fictional Singapore SME, use gross margin, conversion rate, media budget. derive allowable CPA and break-even ROAS. Return budget guardrail sheet. Add source, assumption and reviewer columns. Reject when ROAS alone ignores margin and fulfillment.
