

Lab 03: Platform feasibility scoring → TikTok short-video feasibility

1. For the fictional Singapore SME, use audience fit, format fit, cost, capability. weight factors and score channels consistently. Return platform selection matrix. Add source, assumption and reviewer columns. Reject when Popularity is not audience fit.
2. For the fictional Singapore SME, use creative inventory, placement, audience behavior. match Feed, Stories or Reels to message and asset. Return format-to-CTA map. Add source, assumption and reviewer columns. Reject when Old IGTV guidance is obsolete.
3. For the fictional Singapore SME, use community intent, account assets, response capacity. separate discovery and community service objectives. Return cross-placement plan. Add source, assumption and reviewer columns. Reject when Duplicated creative may crop or underperform.
4. For the fictional Singapore SME, use buying committee, professional proof, lead value. score professional audience against acquisition cost. Return B2B pilot rationale. Add source, assumption and reviewer columns. Reject when Broad consumer hooks may misfit B2B.
5. For the fictional Singapore SME, use demonstration potential, editing time, audience age. compare hook retention and production burden. Return video pilot decision. Add source, assumption and reviewer columns. Reject when Trend imitation can weaken brand fit.
