

Lab 01: Campaign objective and KPI tree → Campaign brief and brain

1. For the fictional Singapore SME, use business goal, audience, baseline. map goal to one primary conversion event. Return SMART brief and KPI owner. Add source, assumption and reviewer columns. Reject when Vanity engagement masks low-intent traffic.
2. For the fictional Singapore SME, use aggregate insights, interview notes, consent status. separate observed signal from AI inference. Return evidence-backed audience segment. Add source, assumption and reviewer columns. Reject when Inferred sensitive traits can breach trust.
3. For the fictional Singapore SME, use awareness questions, comparison needs, conversion friction. link each stage to content, CTA and metric. Return journey-to-content matrix. Add source, assumption and reviewer columns. Reject when A single post cannot serve every intent.
4. For the fictional Singapore SME, use five public competitor posts, dates, formats. code hooks, proof, CTA and engagement by format. Return gap and differentiation map. Add source, assumption and reviewer columns. Reject when Copying creative weakens differentiation.
5. For the fictional Singapore SME, use offer facts, audience, exclusions, voice rules. constrain AI output with proof and prohibited claims. Return approved creative brief. Add source, assumption and reviewer columns. Reject when AI may invent benefits and testimonials.
