

Lab 08: A/B test interpretation → Organisational impact review

1. For the fictional Singapore SME, use two variants, same audience, sample size. compare conversion and uncertainty before choosing. Return test decision memo. Add source, assumption and reviewer columns. Reject when Peeking can create false confidence.
2. For the fictional Singapore SME, use clean export, metric definitions, anomalies. ask AI to summarize changes with cited rows. Return reviewed weekly insight memo. Add source, assumption and reviewer columns. Reject when AI can invent causality from correlation.
3. For the fictional Singapore SME, use consent, site visits, exclusions, window. build eligible audience with suppression rules. Return retargeting policy. Add source, assumption and reviewer columns. Reject when Persistent targeting can feel intrusive.
4. For the fictional Singapore SME, use segment CPA, lead quality, delivery constraints. shift spend toward incremental qualified return. Return reallocation decision. Add source, assumption and reviewer columns. Reject when Optimizing solely to ROAS may starve discovery.
5. For the fictional Singapore SME, use baseline effort, cost, quality, outcomes. compare AI-assisted workflow with control and risk cost. Return impact scorecard. Add source, assumption and reviewer columns. Reject when Speed gains can hide review burden.
